Abstract

The proposed system is “Project Management System web application”. Imagine you've got a big project ahead, but it can be confusing and challenging to manage. That's where our Project Management System comes in. This system is like a digital helper designed just for students and teachers in the college, by creating the environment to develop project. System makes it easy to plan, work on, and finish your projects. The primary goal is to streamline the entire lifecycle of final year projects, from project proposal to completion. It aims to simplify administrative processes and reduces paperwork. The system provides tracking of project progress, allowing students and mentor to track project phases including requirement gathering, analysis, design, submission of project proposal, coding, testing. System encourages proper documentation of reports regarding to task, project to easy retrieve when needed. System provides a user-friendly interface to ensure that students, faculty, and administrators can easily navigate and utilize the system.
