Acknowledgment

We would like to express our sincerest gratitude to all people who have contributed towards our project. We would like to extent our heartiest thanks to the Head Of Computer Department, our guide Ms. Surekha Patil madam, for nourishing a congenial yet competitive environment in the department, which motivates all the students to pursue higher goals and for his constant support, guidance, encouragement. Her sincerity, thoroughness and perseverance have been a constant source of inspiration for us. Last but not the least we would like to extent our thanks to all teaching and non-teaching staff members of our department and all our colleagues who helped me in completion of the project.

Abstract

The proposed system is "Project Management System web application". Imagine you're in the final year of course. You've got a big project ahead, but it can be confusing and challenging to manage. That's where our Project Management System comes in. This system is like a digital helper designed just for students and teachers in the college, by creating the environment to develop project. System makes it easy to plan, work on, and finish your projects. The primary goal is to streamline the entire lifecycle of final year projects, from project proposal to completion. It aims to simplify administrative processes and reduces paperwork. The system provides tracking of project progress, allowing students and faculty to monitor milestones, deadlines, and deliverables. System encourages proper documentation of reports regarding to task, project to easy retrieve when needed. System provides a user-friendly interface to ensure that students, faculty, and administrators can easily navigate and utilize the system.
